

Shekinah Services Credit Repair Service Info Sheet

GETTING YOU ON THE RIGHT PATH:

Shekinah Services know that you are more than a number, and we believe that you have the right to prove it. Our experience with credit improvement will fight to remove negative items and educate you where you will be empowered to start living a new life without limitations.

PROVEN RESULTS:

Shekinah Services is a trustworthy company with education and administration skills to help repair and rebuild your credit status. Our results will begin happening within your 90 day service period. We produce secure credit restoration through these simple steps.

Step 1: Forward Your Credit Reports.

You begin by obtaining your credit reports from all three credit bureaus. Forward your credit reports to us. Keep in mind that the credit bureaus will only correspond with you, not our company. Therefore, all updated reports should be mailed to Shekinah Services.

Step 2: Choose Which Items to Dispute.

Once we receive credit reports, we will need to consult with you, the customer, about which items to dispute. We will create a strategy from your response and begin the process.

Step 3: Shekinah Services Works Your Case.

Shekinah begins the dispute process by drawing upon its vast credit repair strategies and experience to challenge negative items directly with credit bureaus. Depending on the number of negative items on your credit report, this step will be repeated for each subsequent loop through the cycle.

Step 4: Sit Back & Relax.

The credit bureaus have 30 days to investigate your dispute. After that, they must inform you of the result of their investigation, update your credit report, and send you a copy of the updated report free. It usually takes 60 days between the day we send a dispute and you receive an updated report. When you receive the responses from the bureaus, make a copy of the updated report for your records then send the originals to Shekinah Services to move your case forward. We will continue the process as stated in the service contract.

Step 5: Be Patient!

Many customers are anxious to begin repairing and rebuilding their credit as soon as possible. However, it depends on how long it took you to create negative reportings and how many and how much dedication you bring to repairing your credit before you see a greater difference. So, Be Patient!
